

INDEX TO VOL. V.

- ABEL, J. J.** Further observations on epinephrin, v.
- ALDRICH, T. B.** A preliminary report on the active principle of the suprarenal gland, 457.
- Arenicola** larvæ, movements influenced by salt solutions, 56.
- ARKIN, L.** See **PARKER** and **ARKIN**, 151.
- AUER, J.** See **JONES** and **AUER**, 321, xvii.
- BARDEEN, C. R.** The function of the brain in *Planaria maculata*, 175.
- BARDEEN, C. R.** On the physiology of the *Planaria maculata*, with especial reference to the phenomena of regeneration, i.
- Blood corpuscles, counting, iv.
- Blood plates, counting, iv.
- Blood-pressure, during muscular effort, 95.
- , in sleep, 199.
- Blood-pressure experiments, danger of magnesium sulphate, iii.
- Brain, function in *Planaria*, 175.
- Bromine proteolysis, xiii.
- BRUSH, C. E., JR.,** and **R. FAVERWEATHER.** Observations on the changes in blood-pressure during normal sleep, 199, iii.
- CALHOUN, H.** See **KEMP** and **CALHOUN**, iv.
- CARTER, W. S.** The physiological action of three poisonous toadstools — *Amanita muscaria*, *Amanita verna* or *bulbosa*, and *Amanita phalloides*, 158, xvii.
- CARTER, W. S.** A note on the use of a saturated solution of magnesium sulphate for preventing the coagulation of blood in blood-pressure experiments, iii.
- Ciliary movement, *Arenicola*, 56.
- CLARK, G. P.** A rheocord, xvii.
- CLARK, G. P.** for **N. JACOBSON.** A hair-cast of a living human stomach, xvii.
- CLEGHORN, A.** and **H. D. LLOYD.** The effect of carbon dioxide and oxygen on smooth muscle, xvi.
- CLEGHORN, A.** and **C. C. STEWART.** The inhibition time of a voluntary muscular contraction, 281.
- Cocoanut, germination, xiv.
- Connective tissue, chemistry, 287.
- DEGLUTITION**, xvii.
- ELASTIN**, preparation, xi.
- Electricity, effect on organism, 301.
- ELLIS, F. W.** Studies in the physiology and psychology of visual sensations and perceptions, 462.
- Epinephrin, chemistry, v.
- , physiological action, v, vii.
- Erigograph, 240.
- Exercise, blood pressure in, 95.
- FATIGUE**, neuromuscular, 240.
- FAVERWEATHER, R.** See **BRUSH** and **FAVERWEATHER**, 199, iii.
- Ferments, reversible action, xii.
- FITZ, G. W.** and **F. W. HITCHINGS.** A study of the seasonal variations of growth in weight of children, xvii.
- FRIED, G. A.** and **W. J. GIES.** Does muscle contain muscin? x.
- GIES, W. J.** A note on the excretion of kynurenic acid, 191.
- GIES, W. J.** An improved method of preparing and preserving meat for use in metabolism experiments, 235.
- GIES, W. J.** See **FRIED** and **GIES**, x.
- GIES, W. J.** See **HAWK** and **GIES**, 387, xv.
- GIES, W. J.** See **KIRKWOOD** and **GIES**, xiv.
- GIES, W. J.** See **MEAD** and **GIES**, 104.
- GIES, W. J.** See **RICHARDS** and **GIES**, xi.
- GIES, W. J.** See **VANDEGRIFT** and **GIES**, 287.
- Glucoproteid, in bone, xv.
- Growth of children, seasonal variations, xvii.

HAIR-CAST of stomach, xvii.

HAWK, P. B. and W. J. GIES. Chemical studies of osseomucoid, with determinations of the heat of combustion of some connective tissue gluco-proteids, 387.

HARE, H. A. Studies on the influence of strychnine on the spinal cord of rabbits, 333.

HAWK, P. B. and W. J. GIES. A further study of the glucoprotein in bone, xv.

HITCHINGS, F. W. See FITZ and HITCHINGS, xvii.

HOLMES, S. J. Phototaxis in the Amphipoda, 211.

HOUGH, T. Ergographic studies in neuromuscular fatigue, 240.

HUNT, R. Further observations on the blood-pressure-lowering bodies in extracts of the suprarenal gland, vi.

HUNT, R. On the effects of intravenous injections of minimal doses of epinephrin sulphate upon the arterial blood-pressure, vii.

Hydra, reaction to constant current, 301.

Hydrochloric acid, formation, 180.

INHIBITION, voluntary contraction, 281.

Irritability, muscular, 362.

JACOBSON, N. A hair-cast of a living stomach, xvii.

JONES, W., and J. AUER. On the oxidation of native pigments, 321, xvii.

KEMP, G. T., and H. CALHOUN. Some new observations on blood-plates and leucocytes, iv.

KIRKWOOD, J. E., and W. J. GIES. Changes in the composition of the coconut during germination, xiv.

KODIS, T. The electrical resistance in dying muscle, 267.

Kynurenic acid, excretion, 191, 427, ix.

LABORATORY table for students, xvii.

LEVENE, P. A. A note on the chemical nature of trypsin, 298.

LEVENE, P. A. Analysis of some nucleic acids, viii.

LEVIN, I. Physiological studies on the blood of animals deprived of the adrenals, 358, ix.

Light, directive influence on earthworm, 151.

LILLIE, R. On differences in the effects of various salt-solutions on ciliary and on muscular movements in *Arenicola* larvæ. — I., 50.

Lipase, xii.

LLOYD, H. D. See CLEGHORN and LLOYD, xvi.

LOEB, J. On an apparently new form of muscular irritability (contact irritability?) produced by solutions of salts (preferably sodium salts) whose anions are liable to form insoluble calcium compounds, 362.

LOEVENHART, A. S. On the occurrence of lipase in the body, and its reversible action, xii.

Lymph hearts, effect of ions on contraction, 87.

—, innervation, 196.

MCCURDY, J. H. The effect of maximum muscular effort on blood-pressure, 95.

Magnesium sulphate, dangerous in blood-pressure experiments, iii.

MEAD, L. D., and W. J. GIES. Physiological and toxicological effects of tellurium compounds, with a special study of their influence on nutrition, 104.

Meat, preparation for metabolism experiments, 235.

MELTZER, S. J. On the movements of the œsophagus and the cardia, xvii.

MELTZER, S. J. On some of the complexities of the centre of deglutition, xvii.

MENDEL, L. B., and E. C. SCHNEIDER. Further experiments on the excretion of kynurenic acid, ix.

MENDEL, L. B., and E. C. SCHNEIDER. On the excretion of kynurenic acid (second paper), 427.

MENDEL, L. B., and F. P. UNDERHILL. Observations on the products of papain and bromelin proteolysis, xiii.

Metabolism, influenced by tellurium, 104.

MOORE, A. The effect of ions on the contractions of the lymph hearts of the frog, 87.

MOORE, A. Are the contractions of the lymph hearts of the frog dependent upon centres situated in the spinal cord? 196.

MOORE, B., and C. O. PERINTON. On the effects of complete removal of the suprarenal glands, 182.

Mucin, in ligament, xi.

—, in muscle, x.

- Muscle, contact irritability, 362.
 —, electrical resistance, 267.
 —, fatigue, 240.
 —, inhibition time of contraction, 281.
 —, mucin, x.
 —, non-striated, influence of carbon dioxide and oxygen, xvi.
- N**ERVE CENTRES, fatigue, iv.
 Nucleic acid, composition, viii.
- Œ**SOPHAGUS, movements of, xvii.
 (Œsophagus, rhythmic activity, 338.
- OSBORNE, T. B. A type of reaction by which sodium carbonate and hydrochloric acid may be formed in the animal organism, 180.
- OSSEOMUCOID, chemistry, 387.
- P**APAIN proteolysis, xiii.
 PARKER G. H. and L. ARKIN. The directive influence of light on the earth-worm *Allolobophora fetida* (Sav.), 151.
- PEARL R. Studies on the effects of electricity on organisms. II.—The reactions of *Hydra* to the constant current, 301.
- Photopathy, 228.
- Phototaxis, in *Amphipoda*, 211.
- Pigments, oxidation of, 321.
- Planaria maculata*, function of brain, 175.
 —, physiology, i.
- Plethysmograph, 203.
- Proceedings of the American Physiological Society, iii–xvii.
- Proteolysis, xiii.
- PURINGTON, C. O. See MOORE and PURINGTON, 182.
- R**EGENERATION, *Planaria maculata*, i.
- REICHERT, E. T. A student's laboratory table, xvii.
- REICHERT, E. T. A new rheotome, xvii.
- REICHERT, E. T. A rheocord, xvii.
- Rheocord, xvii.
- Rheotome, xvii.
- Rhythm of Œsophagus, 338.
- RICHARDS, A. N., and W. J. GILES. Methods of preparing elastin, with some facts regarding ligament mucin, xi.
- Rigor, force of contraction, 374.
- S**ALIVA, sulphocyanide content, 274.
 SCHNEIDER, E. C. On the variations in the sulphocyanide content of human saliva, 274.
- SCHNEIDER, E. C. See MENDEL and SCHNEIDER, ix.
- Sleep, vascular changes, 109, iii.
- Sodium carbonate, formation, 180.
- Sphygmomanometer, 203.
- STEVENS, N. M. On the force of contraction of the frog's gastrocnemius in rigor, and on the influence of "chloretone" on that process, 374.
- STEWART, C. C. See CLEGHORN and STEWART, 281.
- STILES, P. G. On the rhythmic activity of the Œsophagus and the influence upon it of various media, 338.
- Stomach, movements of, xvii.
- Strychnine, influence on spinal cord, 333.
- Suprarenal gland, action on blood pressure, vi, ix.
 —, active principle, 457.
 —, function, 358.
- T**ELLURIUM, action of, 104.
 Toadstools, physiological action, 158.
- Tobacco, effect on fatigue, 262.
- Trypsin, chemical nature, 208.
- U**NDERHILL, F. P. See MENDEL and UNDERHILL, xiii.
- V**ANDEGRIFF, G. W., and W. J. GILES. The composition of yellow fibrous connective tissue, 287.
- Visual sensations and perceptions, 462.
- W**OODWORTH, R. S. On the rate of fatigue of nerve centres, iv.
